Provider Bush Green
Bean

Phaseolus vulgaris

150 seeds

Days to Sprout:	7 to 10
Days to Maturity:	50
Height at Maturity:	16 to 20 inches
Row Spacing:	36 inches
Plant Spacing:	4 to 6 inches
Planting Depth:	¾ to 1 inch

Favorite variety of many market growers. Big and bushy. Cranks out firm, medium-thickness, medium-length green beans that really satisfy. Steamed, pan-fry, or process.

How to Grow

Sow at three-week intervals from after last spring frost until 8-10 weeks before fall frost. Harvest when skin is taut, before the beans become discernible in the pod. Pick beans every other day and plants will produce for 3 or 4 weeks.
